

NC Specification (Mitsubishi M70VA)

Item	Specification
Controlled axis	Simultaneously controlled axes
	Least input increment
	Absolute
	Inch / metric conversion
Interpolation	G20, G21
	Positioning
	Linear Interpolation
Feed function	Circular Interpolation
	G00
	G01
Program / Editing	G02, G03
	Dwell
	Handle traverse override
	0.001/0.01/0.1mm (0.000039"/0.000039"/0.000039)
	Travel override
	F0, 25, 50, 100%
	Feed override
Screen display	0-200% (10% unit)
	Jog override
	0-6000mm/min (196.9jpm) (20steps)
Interface	Rapid travel : linear
	Automatic deceleration
STM function	Cutting feed : exponential Soft over travel
	Program storage length
	M70 : 600m M700 : 1280m
	Number of stored programs
	M70 : 400 M700 : 1000EA
	Program editing
	Del, Ins, Alt, Protect
	Program number search
Tool function	Program Name
	Sequence number search
	N4 Digits
Coordinate system	Program data input
	G10
	Background editing
Program aux. functions	Manual data input / rigid tapping
	Operation panel
	8.4" Color LCD
Tool	Language
	English / Korean / Chinese / EU
Taper code	Data input/output interface
	RS-232C
M, B function	Taper code
	CF CARD
	Spindle speed function
Work coordinate system	S5 digit
	Tool
	T2 digit
Work coordinate system	M, B function
	M2, B2 digit
	Tool length compensation
Tool diameter compensation	Tool diameter compensation
	Number of tool compensations
	400
Program restart	Automatic origin return
	G28
	Origin return confirmation
	G27
Program aux. functions	Automatic work coordinates
	Work coordinate system
	G53(machine), G54-G59
Program aux. functions	Auxiliary function
	M
	Drilling canned cycle
	Mirror image
	Program restart

SM 400

TAPPING CENTER

- 1988 - Started as Samsung Heavy Industries Machine Tools Business
- 1989 - Horizontal and vertical machining center technology partnership with OKK Japan
- 1991 - Turning center and vertical machining center technology partnership with Mori Seiki
- 1996 - 5-sided processing center technology partnership with Toshiba
- 1999 - Spun out from Samsung Aerospace Industries and established SMEC Co., Ltd

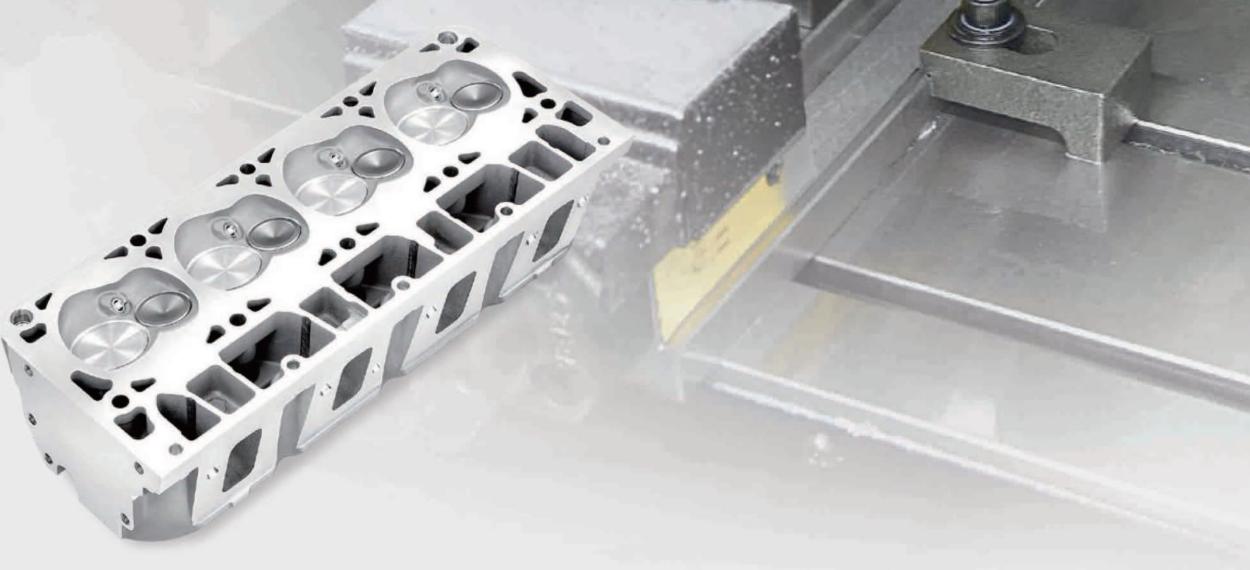

SMEC
Company

Samsung

Great Productivity, Vertical Tapping Center

Ideal for mass production of automotive parts, IT parts and mold machining.

Newest champion in vertical tapping centers
Futuristic vertical machining center with advanced technology in a compact design

Spindle

Fanuc

Spindle Speed
12,000 rpm

Spindle Motor
3.7/5.5 kW

Spindle Torque
23.5/35 N.m

Fanuc

Spindle Speed
20,000 rpm

Spindle Motor
2.2/3.7 kW

Spindle Torque
6.9/11.8 N.m

SIEMENS

Spindle Speed
24,000 rpm

Spindle Motor
5.5/11 kW

Spindle Torque
3.7/2.4 N.m

Mitsubishi

Spindle Speed
12,000 rpm

Spindle Motor
3.7/5.5 kW

Spindle Torque
12.6/18.8 N.m

Mitsubishi

Spindle Speed
24,000 rpm

Spindle Motor
2.2/3.7 kW

Spindle Torque
7/17.7 N.m

Capable of supporting a variety of machining operations with its 20,000 rpm Direct Motor and optimized bearing pre-loaded settings that increase rigidity, counter temperature increase during operation and extend bearing life.

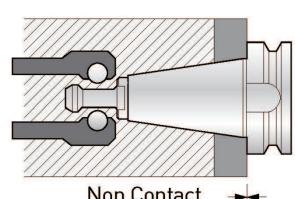

Spindle Taper

2-face tool locking system offered (STD)

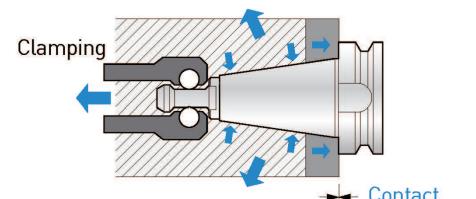

The dual contact against the spindle surface and taper surface reduces vibration while enabling high precision, high speed machining.

The increased diameter enhanced the rigidity and ATC repeatability while improving tool life by preventing Z-axis displacement during high speed machining.

Before Clamping

After Clamping

High-speed tool changer being driven by enhanced technologies

ATC & Magazine

The standard unit has a 21 tool turret-type magazine. While the twin-arm type offers fast tool changes of 1.4 second Tool to Tool and 2.3 second Chip to Chip, minimizing the amount of non-cutting time.

Servo Motor ATC

The high-speed/precision servo motor ATC is a "must have item" to maximize productivity.

the most advanced mechanism of high-speed technology

Servo Motor

Travel precision was improved by directly connecting the ballscrew with high reliability servo motors for each axes.

Guide Way

The use of LM Guides with superb responsiveness increased rapid traverse speeds and reduced non-cutting time while minimizing noise during travel. In particular, by minimizing Stick Slip and wear that occurs on normal slides, we can maintain precision over long machining periods.

Ball Screw

The ballscrews were anchored on both ends using 4 rows of Angular Thrust Bearings with pre-tension to prevent thermal expansion due to the increased temperature of the ballscrew during operation and backlash.

In addition, the ballscrews are directly coupled to the servo motor to enable precise axis travel.

Rapid Traverse

Offering best-in-class rapid traverse of 60m/min and 1G deceleration significantly reducing non-cutting time.

Optimized high-performance features

Table

The wide table work surface and completely enclosed slide way structure keeps chips and coolant out of the guideways.

Chip Conveyor**Centralized Utility Alcove**

Operation status of lubrication, air supply, etc. can easily be checked.

X-Axis
530 mm
Y-Axis
400 mm
Z-Axis
350 mm

**Centralized Operation Panel**

- 8.4 inch color LCD
- Semipermanent LED Lamp
- Swivel operation panel for convenient operation and work access

Spindle Head Cooling System

[20,000 / 24,000rpm]

For long-term continuous high-speed operation, a coolant system may be installed to maintain room temperature. The coolant system circulates coolant oil around the spindle bearings to prevent thermal expansion due to the spindle temperature, ensuring high precision machining.

(12,000rpm : Opt.)

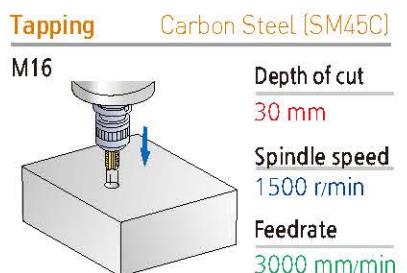

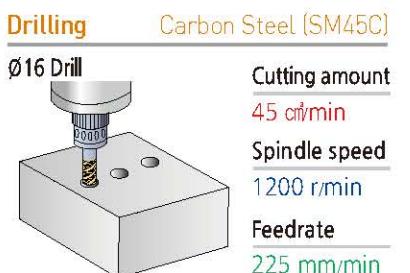

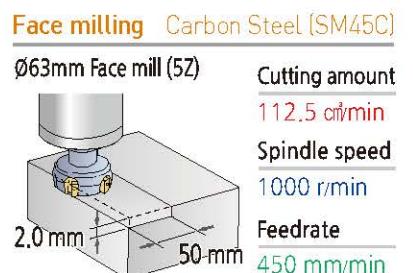

High reliability components used in the electric cabinet to reduce frequency of breakdown.

- Magnet switch, circuit breaker, Key S/W (Fuji)
- Relay (Weidmuller, Omron)

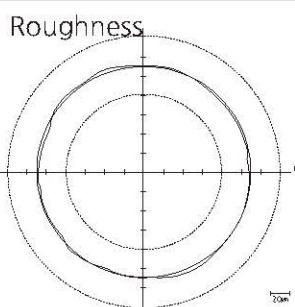

Automatic Lubrication Dispenser

Automatic lubrication dispenser that reliably dispenses the required amount of lubrication to the required travel axes. Lubrication is only dispensed when the travel axes is in operation, reducing the amount of lubrication that is consumed.

Cutting Capacity (BBT30 3.7/5.5KW)

High Precision

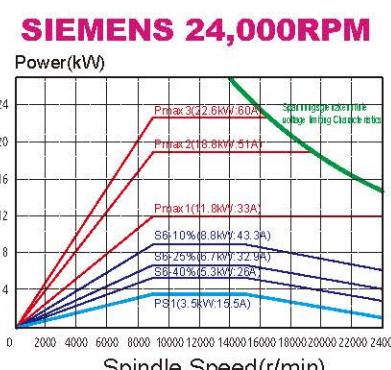

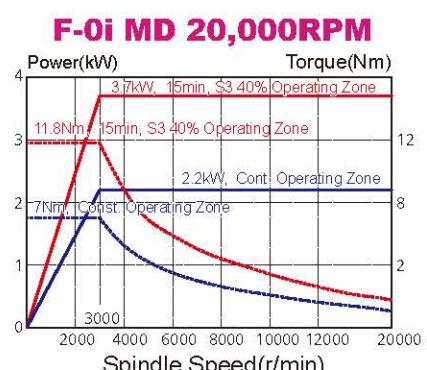

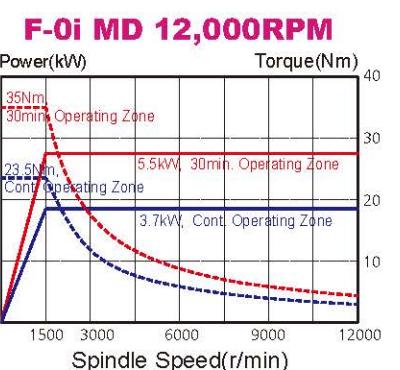

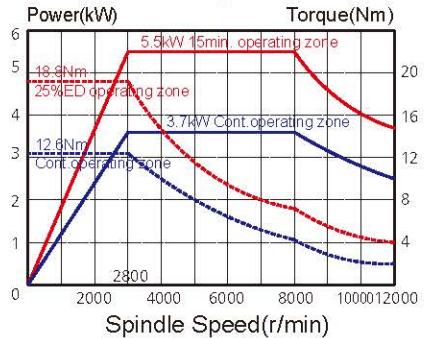

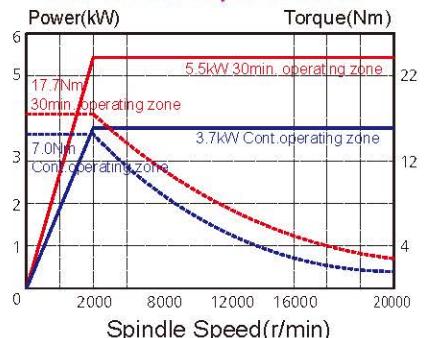

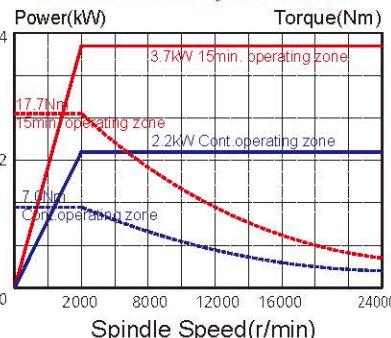

5.80 μm
Roundness

Machine	SM 400
Material	A 1050P
Tool	Ø25x4T
Spindle Speed	1,500RPM

Surface Roughness <O.D. cutting>

0.091 μmRy

() : Optional

Standard Accessories

- Full splash guard
- 3 step patrol lamp
- MPG handle
- Coolant system (1.8kW)
- Rigid tapping
- Manual and parts list
- Leveling parts (Level plate, bolt, etc.)
- Spindle override
- Standard tools and tool box
- Spindle
- Door inter lock
- Bed flushing
- Lubrication system
- Work light (LED)

Optional Accessories

- Air gun
- Through spindle coolant (TSC 20Bar)
- Air blow
- Tool length measurement system (Automatic)
- Coolant gun
- Spindle oil cooler
- Rotary table
- HYD unit
- Oil skimmer
- Mist collector (Top cover must be installed)
- Coolant level gauge
- Top cover (Recommended when using TSC)
- Lift-up chip conveyor (HINGE TYPE / SCRAPER TYPE)

NC Specifications (FANUC 0i-MF)

Item	Description
Controlled axes	Controlled axes
	Max. simultaneously controlled axes
	Least input increment
